**Innovative TimeCutter™ ZX from Toro®  
New Riding Mower Delivers Speed and Performance**

MINNEAPOLIS, MN – Toro has done it again. The company has created an innovative riding mower that can cut the time it takes to mow a lawn in half. The new TimeCutter™ ZX uses time-saving zero turning radius technology developed for professional cutters.

The zero turning radius drive system makes the TimeCutter ZX more efficient than traditional front-engine lawn and garden tractors. The rear wheels provide both the power and the steering, and they operate independently. One wheel can rotate forward while the other rotates in reverse. This allows the TimeCutter ZX to make any turn, from 0- to 360-degrees. That unlimited maneuverability means fast, efficient trimming around trees, flowerbeds -- any obstacle in the yard. In addition, the TimeCutter ZX is faster than traditional riding mowers, reaching speeds up to 6.5 mph.

The TimeCutter ZX is easy to use. Two hand levers replace the steering wheel, gas pedal and brake pedal used on traditional riding mowers. The control levers are equipped with hydraulic dampers for a smooth response. They're easy to reach and comfortable to maneuver.

With most of the weight located in the rear of the machine and a low center of gravity, the TimeCutter ZX really hugs the terrain. Toro's wide footprint provides great stability, better traction and a smooth ride.

Tough steel construction makes the TimeCutter ZX a durable machine. The front frame is made of 1"x2"x.12" structural steel tube. The rear frame is made up of seven- and ten-gauge steel. TimeCutter ZX mowing decks are made from 12- and 13-gauge steel and feature heavy-duty spindle assemblies.

Other TimeCutter ZX design features include:

- Large mowing decks - 44- and 52-inches - for great cutting coverage.
- Patented Recycler® deck option - There's no need to bag your clippings.
- A large, easy-to-fill five gallon gas tank - Reducing the need to stop and fill up.
- Front-mounted anti-scalp rollers with two height positions - helps protect your turf.

When designing the TimeCutter ZX engineers didn't forget about comfort. Adjustable control levers, a high back foam padded seat and the largest foot rest platform of any zero turning radius mower make for an enjoyable lawn mowing experience.

The TimeCutter ZX is backed by Toro's two-year, full coverage warranty. If anything goes wrong with the machine under normal use, Toro will fix it for free.

Toro is a leading worldwide provider of outdoor maintenance and beautification products for home, recreation and commercial landscapes.
