**The New Toro TimeCutter™ Z
Get the job done, have more fun!**

MINNEAPOLIS, MN – If you could grant any homeowner one wish, more than likely that wish would be for more time. More time to get things done. More time for the fun things in life.

That's why Toro has created a lawn mower that can get you to those fun things faster. In fact, the new Toro TimeCutter™ Z can cut your mowing time in half. How can this be possible? Simply put, the TimeCutter Z is faster and easier to maneuver.

At first glance you may think this riding mower is missing a steering wheel. That's part of the secret. Dual wrap-around levers with hydraulic dampers control the steering, acceleration and braking. They're easy and comfortable to use, and they're the key to the TimeCutter's maneuverability. (For more info on the levers, see attached release.)

The secret is in the zero turning radius technology. The rear wheels of the TimeCutter Z operate independently. One wheel can spin full ahead while the other spins full reverse, allowing the TimeCutter Z to make any turn, from 0- to 360-degrees. This zero turning radius technology makes it easy to mow around trees, flowerbeds and other obstacles in one easy sweep. It also means that you'll be able to turn on a dime at the end of a row without missing any sections of your lawn. This superior turning ability translates into time savings. You no longer have to jockey around trees or

bushes. There's no back-tracking at the end of a row to cut the area you've missed. The TimeCutter Z cuts it the first time. And with a forward speed of up to 6.0-mph, cutting the straight-aways is a quick and easy task.

The new TimeCutter Z was designed with the homeowner in mind. It features a sleek look and easy-to-use controls. An adjustable foot rest, adjustable control levers, and high-back, adjustable seat keep the operator comfortable while mowing. A cup holder and toolbox keep your "essentials" safely stored. There is even an engine cover to help reduce noise.

The Toro Company has been a leader in professional landscape products for more than 80 years. The new TimeCutter Z models are built with that history of quality in mind. In a business where time is money, professional landscape contractors use the tools that get the job done fast. That's why they use Toro zero turning radius mowers. They depend on the technology, now homeowners can too.

The new TimeCutter Z models range from 14- to 17-horsepower, and are available with either 38-inch or 42-inch mowing decks. Each model is backed by Toro's 2-year full warranty. If anything goes wrong with your TimeCutter under normal use, Toro will fix it for free. Prices start at just \$2,699. Optional Toro Recycler® kits, baggers and snow blades are also available. Visit your nearest Toro dealer to check out the new line of Toro TimeCutter Z mowers.

Toro is a leading worldwide provider of outdoor maintenance and beautification products for home, recreation and commercial landscapes.
