**The Toro Twister™ Utility Vehicle:
A Powerful Solution for a Variety of Chores**

MINNEAPOLIS, MN – Toro has created a versatile utility vehicle that hauls, dumps, plows and transports. The new Toro Twister™ is the smart choice to help you get the work done. With the Twister you'll be equipped to tackle the toughest chores your acreage can dish out.

One look at the Twister will tell you this truck-style vehicle is ready to work. Its exclusive suspension system sets it apart from the competition. In front, an independent A-Arm Suspension absorbs the shocks from uneven terrain. And its Active In-Frame Suspension twists to allow the front of the vehicle to adjust to the terrain independently of the rear of the vehicle. That means all four wheels stay in contact with the ground at all times. The result is better traction, improved stability and a smooth ride through rugged plowed fields and pasture areas.

Heavy hauling jobs are a breeze for the Twister. The Twister has a best in class 14.75 cubic foot bed capacity and a payload capacity of up to 1,600 pounds. The Twister's double-walled polyethylene bed is resistant to dents and corrosion so it will remain maintenance free for years. And, unloading has never been easier thanks to quick-release latches on the cargo bed gate and the easy-to-use manual lift. Adding an optional electric bed lift makes dumping heavy loads a simple task.

When tending to animals, the Twister is perfect for everyday chores such as hauling feed or bedding. With speeds of up to 20-mph, the Twister gets the job done faster and easier than using a tractor. Available 4-wheel hydraulic brakes give you plenty of stopping power and control. And,

maneuvering in tight places is no problem. The Twister's sector and pinion steering and nine-foot turning radius make it the most agile utility vehicle available.

Toro engineers kept comfort in mind while designing the Twister. Twin bucket seats, a wide step-through operator area, and lots of legroom make a hard day's work easier to take. A cup holder and plenty of under-the-seat storage space are great for tools and other necessities. There is even a 10-amp accessory power plug for your electrical needs.

With more than 25 attachments and accessories available, every Toro Twister can be customized to your particular needs. Stake sides add versatility by allowing for large capacity loads such as lumber or bales of hay. The brush guard/bumper adds extra protection to the grill area. From the electric winch to the rear receiver hitch, there are plenty of options to help increase productivity while reducing effort and stress.

The new Twister utility vehicle's manufacturer's suggested retail price starts at \$6,999.

Toro is a leading worldwide provider of outdoor maintenance and beautification products for home, recreation and commercial landscapes.
